Factor Long Certificates and Factor Short Certificates are Share Securities being leveraged securities with no fixed term, which give investors a level of exposure from moderate to high to the price and performance of the relevant Underlying Share as described in Part A "Product Specific Provisions (all Securities)" (Item 23) that is greater than the capital invested. The leveraged nature of the Certificates means that any movement in the value of the relevant Share will have a magnified effect on the value of the Certificates, both positively and negatively.

With regard to Factor Long Certificates the Certificates will increase in value when the relevant Underlying Share increases in value and decrease in value when the relevant Underlying Share decreases in value. With regard to Factor Short Certificates the Certificates will increase in value when the relevant Share decreases in value and decrease in value when the relevant Underlying Share decreases in value and decrease in value when the relevant Underlying Share decreases in value and decrease in value when the relevant Underlying Share increases in value when the relevant Underlying Share increases in value.

The Certificates are "Share Securities" Certificates. The Certificates feature a constant Leverage Factor and a Reset Threshold. With regard to Factor Long Certificates a Reset Event occurs if, on any Underlying Business Day, in the determination of the Calculation Agent the traded price of the relevant Underlying Share is at one or more time during any Observation Time Period, equal to or less than the Reset Threshold. With regard to Factor Short Certificates a Reset Event occurs if, on any Underlying Business Day, in the determination of the Calculation Agent the traded price of the relevant Underlying Share is at one or more time during any Observation Time Period, equal to or less than the Reset Threshold. With regard to Factor Short Certificates a Reset Event occurs if, on any Underlying Business Day, in the determination of the Calculation Agent the traded price of the relevant Underlying Share is at one or more time during any Observation Time Period, equal to or greater than the Reset Threshold. After a Reset Event the Reset Threshold will be reset intraday until the next Reset Event or the next Underlying Business Day whichever comes first.

While the use of leverage allows for potential multiples of a return (assuming a return is achieved) when the Underlying Share moves in the anticipated direction, it will conversely magnify losses when the Underlying Share moves against expectations.

The Certificates have no fixed redemption date and the Issuer may choose to redeem them at any time upon giving notice to Holders.

Information on each Share shall be available on the relevant Share Company website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Share are available on the relevant Exchange website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Share may be obtained from the Calculation Agent : <u>markets.ch@bnpparibas.com</u>

The Issuer does not intend to provide post-issuance information.
