The Securities are unlisted.

2. Governing Law and Jurisdiction

As provided in the Conditions, the Securities are governed by French Law and the Paris Court of Appeal shall have exclusive jurisdiction to settle all disputes that may, directly or indirectly, arise out of or in connection with the Securities.

3. Ratings

4. Interests of Natural and Legal Persons Involved in the Issue

Save as discussed in the "*Potential Conflicts of Interest*" paragraph in the "*Risks*" section in the Base Prospectus, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue.

5. Performance of Underlying/Formula/Other Variable, Explanation of Effect on Value of Investment and Associated Risks and Other Information concerning the Underlying

The Index Knock-Out Warrant Call or Put Certificate is a leveraged Certificate with a fixed term, which gives investors a level of exposure from moderate to high to the price and performance of the relevant Index as described in Part A "Specific Provisions for each Series" (the "Underlying Index") that is greater than the capital invested. The leveraged nature of the Certificates means that any movement in the value of the Underlying Index will have a magnified effect on the value of the Certificates, both positively and negatively.

In respect of Call Certificates, the Certificates will increase in value when the Underlying Index increases in value and decrease in value when the Underlying Index decreases in value.

In respect of Put Certificates, the Certificates will increase in value when the Underlying Index decreases in value and decrease in value when the Underlying Index increases in value.

The Certificates are "Call" Certificates or "Put" Certificates. The Certificates feature a Strike Price and a Knock-out Level (which is equal to the Strike Price in respect of Call Certificates and Put Certificates).

The closer the value of Knock-out Level to the level of the Underlying Index from time to time, the higher the leverage effect will be and the higher the risk that the Knock-out Level will be reached. The Certificates will be automatically early redeemed at a price equal to zero if the level of the Underlying Index reaches the Knock-out Level.

On redemption, Holders will receive an amount, which will be equal to (i) in the case of Call Certificates, the excess (if any) of the Settlement Price Final on the Redemption Valuation Date over the Strike Price, or (ii) in the case of Put Certificates, the excess (if any) of the Strike Price over the Settlement Price Final on the Redemption Valuation Date, in each case divided by the product of the Exchange Rate Final, if any, and Parity.

On redemption, Holders will receive an amount, which may be zero, determined by reference to the performance of the Underlying Index, the Capitalised Exercise Price, the Financing Rate and, if applicable, the performance of the Conversion Rate between the Index Currency and the Settlement Currency.

Information on each Index shall be available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Index are available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Index may be obtained from the Calculation Agent: markets.ch@bnpparibas.com

The Issuer does not intend to provide post-issuance information.
