Description	The DAX® Index is Germany's key equity index. It represents about 75% of the market capitalization that trades on the Frankfurt Stock Exchange and comprises 30 selected German blue chip stocks.	The Dow Jones Industrial Average™, also referred to as The Dow®, was the world's first market indicator. The Dow® covers all industries with the exception of transportation and utilities, which are covered by the Dow Jones Transportation Average™ and Dow Jones Utility Average™. While stock selection is not governed by quantitative rules, a stock typically is added to The Dow® only if the company has an excellent reputation, demonstrates sustained growth and is of interest to a large number of investors. Maintaining adequate sector representation within the indices is also a consideration in the selection process.	The Nasdaq-100® Index includes 100 of the largest domestic and international non-financial companies listed on The Nasdaq Stock Market based on market capitalization. The Index reflects companies across major industry groups including computer hardware and software, telecommunications, retail/wholesale trade and biotechnology. It does not contain securities of financial companies including investment companies.	S&P 500® Index includes 500 leading companies in leading industries of the U.S. economy. S&P 500® Index focuses on the large cap segment of the market, with approximately 75% coverage of U.S. equities.
Calculation Agent	DAX® Index is calculated by Deutsche Börse AG.	The Dow Jones Industrial Average™ Index is calculated by S&P Dow Jones Indices, which is a unit of McGraw Hill	The Nasdaq-100® Index is calculated by Nasdaq Inc.	S&P 500® Index is calculated by Standard & Poor's. Moreover, S&P 500® Index is maintained by the S&P Index

		Financial.		Committee, a team of Standard & Poor's economists and index analysts.
Calculation Method	DAX® Index is calculated according to the Laspeyres method using a weighted arithmetic mean by market capitalization, however only freely available and tradable free float shares are taken into account. DAX® Index is a total return index.	The Dow Jones Industrial Average™ is calculated on a price-weighted basis and comprises 30 U.S. blue-chip companies. The Dow Jones Industrial Average™ is a price return index.	The Nasdaq-100® Index is calculated under a modified capitalization-weighted methodology. The methodology is expected to retain in general the economic attributes of capitalization-weighting while providing enhanced diversification. To accomplish this, Nasdaq will review the composition of the Nasdaq-100® Index on a quarterly basis and adjust the weightings of Index components using a proprietary algorithm, if certain pre-established weight distribution requirements are not met. The Nasdaq-100® Index is a price return index.	On any given day, S&P 500® Index value is the quotient of the total float-adjusted market capitalization of the index's constituents and its divisor. Continuity in index values is maintained by adjusting the divisor for all changes in the constituents' share capital after the base date. S&P 500® Index is a price return index.
Frequency	The DAX® Index is calculated in real time. The index is recalculated and republished immediately upon any changes in the price of any security.	The Dow Jones Industrial Average™ is calculated in real time. The index is recalculated and republished every two seconds.	The Nasdaq-100® Index is calculated during the trading day based on the Last Sale Price and is disseminated once per second from 09:30:01 to 17:16:00 ET. The closing value of the Nasdaq-100® Index may change up until 17:15:00 ET due to corrections to the Last Sale Price of the Index Securities.	Changes to the S&P 500® Index is made on an as needed basis. There is no annual or semi-annual reconstitution. Rather, changes in response to corporate actions and market developments can be made at any time. Constituent changes are typically announced two to five days before they are scheduled to be implemented.

**4. Ratings**

The Securities have not been rated.

**5. Interests of Natural and Legal Persons Involved in the Issue**

Save as discussed in the "*Potential Conflicts of Interest*" paragraph in the "*Risks*" section in the Base Prospectus, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue.

**6. Performance of Underlying/Formula/Other Variable, Explanation of Effect on Value of Investment and Associated Risks and Other Information concerning the Underlying**

The Index Knock-Out Warrant Call or Put Certificate is an Open End Turbo ("OET") Certificate being a leveraged security with no fixed term, which gives investors a level of exposure from moderate to high to the price and performance of the relevant Index as described in Part A "Specific Provisions for each Series" (the "Underlying Index") that is greater than the capital invested. The leveraged nature of the Certificates means that any movement in the value of the Underlying Index will have a magnified effect on the value of the Certificates, both positively and negatively.

In respect of Call Certificates, the Certificates will increase in value when the Underlying Index increases in value and decrease in value when the Underlying Index decreases in value.

In respect of Put Certificates, the Certificates will increase in value when the Underlying Index decreases in value and decrease in value when the Underlying Index increases in value.

The Certificates are "OET Call" Certificates or "OET Put" Certificates. The Certificates feature a Capitalised Exercise Price and a Security Threshold (which is equal to the Capitalised Exercise Price in respect of Call Certificates and Put Certificates). Both the Capitalised Exercise Price and the Security Threshold are adjusted by the Calculation Agent on a daily basis according to the cost of financing (the "Financing Rate").

The closer the value of Security Threshold to the level of the Underlying Index from time to time, the higher the leverage effect will be and the higher the risk that the Security Threshold will be reached. The Certificates will be automatically early redeemed at a price equal to zero if the level of the Underlying Index reaches the Capitalised Exercise Price. Otherwise they have no fixed redemption date and the Issuer may choose to redeem them at any time upon giving notice to Holders.

On redemption, Holders will receive an amount, which may be zero, determined by reference to the performance of the Underlying Index, the Capitalised Exercise Price, the Financing Rate and, if applicable, the performance of the Conversion Rate between the Index Currency and the Settlement Currency.

Information on each Index shall be available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Index are available on the relevant Index Sponsor website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Index may be obtained from the Calculation Agent : [markets.ch@bnpparibas.com](mailto:markets.ch@bnpparibas.com)
