#### **PART B - OTHER INFORMATION**

## 1. Listing and Admission to trading

The Securities are unlisted.

## 2. Governing Law and Jurisdiction

As provided in the Conditions, the Securities are governed by French Law and the Paris Court of Appeal shall have exclusive jurisdiction to settle all disputes that may, directly or indirectly, arise out of or in connection with the Securities.

#### 3. Ratings

## 4. Interests of Natural and Legal Persons Involved in the Issue

Save as discussed in the "Potential Conflicts of Interest" paragraph in the "Risks" section in the Base Prospectus, so far as the Issuer is aware, no person involved in the issue of the Securities has an interest material to the issue.

# 5. Performance of Underlying/Formula/Other Variable, Explanation of Effect on Value of Investment and Associated Risks and Other Information concerning the Underlying

The Currency Mini Future Call or Put Certificate is an Open End Turbo ("OET") Certificate being a leveraged security with no fixed term, which gives investors a level of exposure from moderate to high to the price and performance of the relevant Currency as described in Part A "Specific Provisions for each Series" (the "Underlying Currency") that is greater than the capital invested. The leveraged nature of the Certificates means that any movement in the value of the Underlying Currency will have a magnified effect on the value of the Certificates, both positively and negatively.

In respect of Call Certificates, the Certificates will increase in value when the Underlying Currency increases in value and decrease in value when the Underlying Currency decreases in value.

In respect of Put Certificates, the Certificates will increase in value when the Underlying Currency decreases in value and decrease in value when the Underlying Currency increases in value.

The Certificates are "OET Call" Certificates or "OET Put" Certificates. The Certificates feature a Capitalised Exercise Price and a Security Threshold (which is higher than the Capitalised Exercise Price in respect of Call Certificates and lower than the Capitalised Exercise Price in respect of Put Certificates). Both the Capitalised Exercise Price and the Security Threshold are adjusted by the Calculation Agent on a daily basis according to the cost of financing (the "Financing Rate").

The closer the value of Security Threshold to the level of the Underlying Currency from time to time, the higher the leverage effect will be and the higher the risk that the Security Threshold will be reached. The Certificates will be automatically early redeemed at a price between zero and their residual value if the level of the Underlying Currency reaches the Capitalised Exercise Price. Otherwise they have no fixed redemption date and the Issuer may choose to redeem them at any time upon giving notice to Holders.

On redemption, Holders will receive an amount, which may be zero, determined by reference to the performance of the Underlying Currency, the Capitalised Exercise Price, the Financing Rate and, if applicable, the performance of the Conversion Rate between the Currency Currency and the Settlement Currency.

Information on each Currency shall be available on the relevant Underlying website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Currency are available on the relevant Underlying website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Currency may be obtained from the Calculation Agent: markets.ch@bnpparibas.com

The Issuer does not intend to provide post-issuance information.
