6. Performance of Underlying/Formula/Other Variable, Explanation of Effect on Value of Investment and Associated Risks and Other Information concerning the Underlying

The Commodity Knock-Out Warrant Call Certificate is an Open End Turbo ("OET") Certificate being a leveraged security with no fixed term, which gives investors a level of exposure from moderate to high to the price and performance of the relevant Commodity as described in Part A "Specific Provisions for each Series" (the "Underlying Commodity") that is greater than the capital invested. The leveraged nature of the Certificates means that any movement in the value of the Underlying Commodity will have a magnified effect on the value of the Certificates, both positively and negatively.

The Certificates will increase in value when the Underlying Commodity increases in value and decrease in value when the Underlying Commodity decreases in value.

The Certificates are "OET Call" Certificates. The Certificates feature a Capitalised Exercise Price and a Security Threshold (which is equal to the Capitalised Exercise Price in respect of Call Certificates and Put Certificates). Both the Capitalised Exercise Price and the Security Threshold are adjusted by the Calculation Agent on a daily basis according to the cost of financing (the "Financing Rate").

The closer the value of Security Threshold to the level of the Underlying Commodity from time to time, the higher the leverage effect will be and the higher the risk that the Security Threshold will be reached. The Certificates will be automatically early redeemed at a price equal to zero if the level of the Underlying Commodity reaches the Capitalised Exercise Price. Otherwise they have no fixed redemption date and the Issuer may choose to redeem them at any time upon giving notice to Holders.

The underlying is a futures contract with a fixed expiration date. Before expiration, the expiring contracts are sold and new futures contracts with a later maturity date are bought. The price of the new futures contracts may be more, or less, than the price of the expiring futures contracts. This means that after the Futures Rollover Date, the OET Call Certificates will have a higher Financing Level and Leverage or lower Financing Level and Leverage, respectively.

On redemption, Holders will receive an amount, which may be zero, determined by reference to the performance of the Underlying Commodity, the Capitalised Exercise Price, the Financing Rate and, if applicable, the performance of the Conversion Rate between the Commodity Currency and the Settlement Currency.

Information on each Commodity shall be available on the relevant Underlying website as set out in "Specific Provisions for each Series" in Part A.

Past and further performances of each Commodity are available on the relevant Underlying website as set out in "Specific Provisions for each Series" in Part A and the volatility of each Commodity may be obtained from the Calculation Agent : markets.ch@bnpparibas.com

The Issuer does not intend to provide post-issuance information.
