

Transfer of securities to BNP Paribas Arbitrage Issuance B.V. (“BNPP IBV”) pursuant to Part VII of the UK Financial Services and Markets Act 2000

On 19 November 2015, The Royal Bank of Scotland plc (with its registered office at 36 St Andrew Square, Edinburgh, Scotland) (“**RBS**”) and BNP Paribas S.A. (incorporated in France and with its registered office at 16, Boulevard des Italiens, 75009 Paris, France) (“**BNPP**”), acting through its London Branch, announced that the Court of Session in Scotland had approved and sanctioned the implementation of a banking business transfer scheme, whereby certain assets and liabilities related to RBS’s structured retail investor products and equity derivatives business would be transferred to BNPP pursuant to Part VII of the UK Financial Services and Markets Act 2000 (the “**Part VII Scheme**”).

The Part VII Scheme took effect on 7 December 2015 (the “**Effective Date**”).

On the Effective Date, BNPP, acting through its London Branch, became the issuer of those securities originally issued by RBS that were transferred pursuant to the Part VII Scheme. Immediately after the transfer of those securities to BNPP, acting through its London Branch, the role of the issuer under those securities was transferred, also under the terms of the Part VII Scheme, to BNPP IBV, a wholly owned subsidiary of BNPP. As part of the Part VII Scheme, BNPP guarantees all the obligations of BNPP IBV arising in respect of the transferred securities.

Under the Part VII Scheme, amendments were made to the terms of the transferring securities and to agreements related to them from the Effective Date in order to give effect to the Part VII Scheme, including (but not limited to) references to “RBS”, in its capacity as issuer of the transferred securities, being construed as references to “BNPP IBV”.

Details of the securities that have transferred under the Part VII Scheme as well as further information on the Part VII Scheme generally can be viewed at <http://warrants.bnpparibas.com/>

On 23 September 2011, RBS N.V. and The Royal Bank of Scotland plc (with its registered office at 36 St Andrew Square, Edinburgh, Scotland) ("**RBS plc**") announced that the Court of Session in Scotland had approved and sanctioned the implementation of a banking business transfer scheme whereby eligible business carried on in the United Kingdom by RBS N.V. would be transferred to RBS plc pursuant to Part VII of the UK Financial Services and Markets Act 2000 (the "**Part VII Scheme**"). The Part VII Scheme took effect on 17 October 2011 (the "**Effective Date**").

Risk Factors

The purchase of Securities involves substantial risks and will be suitable only for investors who have the knowledge and experience in financial and business matters necessary to enable them to evaluate the risks and the merits of an investment in the Securities. The following summary of certain of these risks should be carefully evaluated before making an investment in the Securities and does not describe all possible risks of such an investment:

(a) **Investment risks.** The price of the Securities may fall in value as rapidly as it may rise and investors may not get back the amount invested. The price of the Securities may be affected by a number of factors, including changes in the value and volatility of the underlying asset(s), the creditworthiness of the Issuer, changes in foreign exchange rates and economic, financial and political events that are difficult to predict. The past performance of an underlying asset or other security or derivative should not be taken as an indication of the future performance of that underlying asset or other security or derivative during the term of the Securities. Owning the Securities is not the same as owning the underlying asset(s) and changes in the market value of any underlying asset may not necessarily result in a comparable change in the market value of the Securities. Investors should further note that they bear the Issuer's solvency risk. For a full description of the Securities including risks, costs and product conditions, as applicable, please refer to the offering materials, Prospectus, Base Prospectus and/or final terms, as applicable.

(b) **Suitability of the Securities.** The purchase of the Securities involves certain risks including market risk, credit risk and liquidity risk. Investors should ensure that they understand the nature of all these risks before making a decision to invest in the Securities. Investors should carefully consider whether the Securities are suitable for them in light of their experience, objectives, financial position and other relevant circumstances. If in any doubt, investors should obtain relevant and specific professional advice before making any investment decision. In structuring, issuing and selling the Securities, the Issuer is not acting in any form of fiduciary or advisory capacity.

(c) **Creditworthiness of Issuer.** The Securities constitute general unsecured contractual obligations of the Issuer and of no other person. Investors in the Securities are relying upon the creditworthiness of the Issuer. If the Issuer fails to make a payment or becomes insolvent you could lose some or all of your investment.

(d) **Secondary market trading.** No assurance can be given that any trading market for the Securities will exist or whether any such market will be liquid or illiquid. The Issuer will use reasonable endeavours, under normal market conditions and its own discretion, to provide a bid/offer price for the Securities and will indicate at the time of providing the quotation how long such quotation will remain actionable, or, in any event, not longer than what the Issuer considers a commercially reasonable time. The Issuer will not be required to provide a bid/offer price if an event or series of events occurs outside the Issuer's control (whether or not affecting the market generally) resulting in, amongst other things, (i) the unscheduled closing (ii) any suspension or (iii) the disruption of any (a) physical or electronic trading system or market affecting the Securities or (b) computer, communications or other service system used by the Issuer to generate a quotation in respect of the Securities. The Issuer may determine a bid/offer price in a different manner than other market participants and prices can vary. Sometimes this variance may be substantial. If the Securities are not traded on any exchange, pricing information may be more difficult to obtain and the liquidity and price of the Securities may be adversely affected. The bid/offer spread will be subject to the Issuer's discretion. Any market making activity commenced may be discontinued at any time.

(e) **Conflicts of interest.** The Issuer and its affiliates, connected companies, employees, officers or clients may from time to time have an interest in financial instruments of the type described in this term sheet and/or related financial instruments and such interests may include: (i) having long or short positions in the Securities, the underlying asset(s) or other securities or derivatives that may affect the value of the Securities; and/or (ii) possessing or acquiring material information about the Securities, the underlying asset(s) or other securities or derivatives that may affect the value of the Securities; and/or (iii) otherwise dealing, trading, holding, acting as market-makers in such securities or instruments. The Issuer may at any time solicit or provide investment banking, commercial banking, credit, advisory or other financial services to the issuer of any underlying asset or to any other company or issuer of securities or financial instruments referred to herein. Such activities and information may cause consequences that are adverse to the interests of the investors in the Securities or otherwise create various potential and actual conflicts of interest. The Issuer has no obligation to disclose such activities or information or other potential and actual conflicts of interest and may engage in any such activities without regard to the interests of the investors in the Securities or the effect that such activities may directly or indirectly have on the Securities.

(f) **Hedging activities.** Notwithstanding any communication that you may have had with the Issuer in respect of the manner in which the Issuer may establish, maintain, adjust or unwind its hedge positions with respect to the Securities: (i) the Issuer may in its absolute discretion determine when, how or in what manner it may establish, maintain or adjust or unwind its hedge positions; (ii) the Issuer may, but is not obliged to, hedge the Securities dynamically by holding a corresponding position in the underlying asset(s) or any other securities, derivatives or otherwise and may hedge the Securities individually or on a portfolio basis; and (iii) any hedge positions are the proprietary trading positions of the Issuer and are not held on your behalf or by the Issuer as your agent.

(g) **Early termination.** The Issuer may terminate the Securities if it determines that it has become unlawful for the Issuer to perform its obligations under the Securities or its ability to source a hedge or unwind an existing hedge in respect of the Securities is adversely affected in any material respect. If the Issuer terminates the Securities early, the Issuer will, if and to the extent permitted by applicable law, pay a holder of the Securities an amount determined to be its fair market value immediately before such termination notwithstanding such circumstances less the actual cost to the Issuer of unwinding any underlying related hedging arrangements.

(h) **Adjustments.** The Issuer may make adjustments to the terms of the Securities if an event (such as a market disruption event or other circumstance affecting normal activities) which affects an underlying asset requires it. This may include any event which has or may have a concentrating or diluting effect on the theoretical value of any underlying asset, including, without limitation, any cash dividend or other cash distribution, stock dividend, bonus issue, rights issue, or extraordinary dividends, or the insolvency of the issuer of the underlying asset, nationalisation of the assets of the issuer of the underlying assets and delisting or suspension of the underlying asset. The Issuer will not be under any obligation to consult with the holder of the Securities in such circumstances.

(i) **Market disruption.** The Calculation Agent for the Securities may determine that a market disruption event has occurred or exists at a relevant time. Any such determination may affect the value of the Securities and/or delay settlement in respect of the Securities. A market disruption event is defined in the relevant terms and conditions of the Securities and includes (but is not limited to) Emerging Market Disruption Events, any suspension or limitation of trading on the Exchange or any Related Exchange, the declaration of a general moratorium in respect of banking activities in the country where the Exchange or any Related Exchange is located and the inability of the Issuer to unwind its hedge or related trading position relating to an underlying asset due to illiquidity. Upon the occurrence of Market Disruption Event, (as defined in the relevant terms and conditions of the Securities), the Calculation Agent may make adjustments to the terms and conditions of the Securities in order to account for such event if it considers it appropriate to do so. Investors should review the terms and conditions of the Securities to ascertain whether and how such provisions apply to the Securities.

(j) **FX market disruption.** Investors should note that all payments on expiry or a secondary market purchase by the Issuer are subject to the ability of the Issuer to, amongst other things, : (i) sell the underlying asset(s); (ii) convert the currency of an underlying asset into the currency of the Securities; and/or (iii) transfer the currency of the Securities from accounts in the country where an underlying asset is located to accounts outside that country. The inability of the Issuer to perform any of the above may affect the value of the Securities and and/or delay settlement in respect of the Securities or, if it results in settlement being delayed for the period specified in the terms and conditions for the Securities (if any), may result in all obligations of the Issuer in respect of the Securities being extinguished.

(k) **Emerging markets.** Investing in emerging markets involves certain risks and special considerations not typically associated with investing in other more established economies or securities markets. Such risks may include: (i) the risk of nationalisation or expropriation of assets or confiscatory

taxation; (ii) social, economic and political uncertainty; (iii) dependence on exports and the corresponding importance of international trade and commodities prices; (iv) less liquidity of securities markets; (v) currency exchange rate fluctuations; (vi) potentially higher rates of inflation (including hyper-inflation); (vii) controls on investment and limitations on repatriation of invested capital; (viii) a higher degree of governmental involvement in and control over the economies; (ix) government decisions to discontinue support for economic reform programs and imposition of centrally planned economies; (x) differences in auditing and financial reporting standards which may result in the unavailability of material information about economics and issuers; (xi) less extensive regulatory oversight of securities markets; (xii) longer settlement periods for securities transactions; (xiii) less stringent laws regarding the fiduciary duties of officers and directors and protection of investors; and (xiv) certain consequences regarding the maintenance of portfolio securities and cash with sub-custodians and securities depositories in emerging market countries.

(l) **Emerging Market Disruption Event.** Emerging Market Disruption Event means, unless otherwise specified in the terms and conditions of the relevant Securities each of the following events: (i) **Moratorium.** A general moratorium is declared in respect of banking activities in the country in which the Exchange or any Related Exchange is located or in the principal financial centre of the Relevant Currency; or (ii) **Price Source Disruption.** It becomes impossible to obtain the Relevant Currency Exchange Rate on any relevant date, in the inter-bank market; or (iii) **Governmental Default.** With respect to any security or indebtedness for money borrowed or guaranteed by any governmental authority, there occurs a default, event of default or other similar condition or event (howsoever described) including, but not limited to, (A) the failure of timely payment in full of principal, interest or other amounts due (without giving effect to any applicable grace periods) in respect of any such security indebtedness for money borrowed or guarantee, (B) a declared moratorium, standstill, waiver, deferral, repudiation or rescheduling of any principal, interest or other amounts due in respect of any such security, indebtedness for money borrowed or guarantee or (C) the amendment or modification of the terms and conditions of payment of any principal, interest or other amounts due in respect of any such security, indebtedness for money borrowed or guarantee without the consent of all holders of such obligation. The determination of the existence or occurrence of any default, event of default or other similar condition or event shall be made without regard to any lack or alleged lack of authority or capacity of such Governmental Authority to issue or enter into such security, indebtedness for money borrowed or guarantee; or (iv) **Inconvertibility/non-transferability.** The occurrence of any event which (A) generally makes it impossible to convert the currencies in the Relevant Currency Exchange Rate through customary legal channels for conducting such conversion in the principal financial centre of the Relevant Currency or (B) generally makes it impossible to deliver the Relevant Currency from accounts in the country of the principal financial centre of the Relevant Currency to accounts outside such jurisdiction or the Relevant Currency between accounts in such jurisdiction or to a party that is a non-resident of such jurisdiction; or (v) **Nationalisation.** Any expropriation, confiscation, requisition, nationalisation or other action by any Governmental Authority which deprives the Issuer (or any of its affiliates) of all or substantially all of its assets in the country of the principal financial centre of the Relevant Currency; or (vi) **Illiquidity.** It is impossible to obtain a firm quote for the Relevant Currency Exchange Rate for an amount which the Issuer considers necessary to discharge its obligations under the Securities; or (vii) **Change in Law.** A change in law in the country of the principal financial centre of the Relevant Currency which may affect the ownership in and/or the transferability of the Relevant Currency; or (viii) **Imposition of Tax/Levy.** The imposition of any tax and/or levy with punitive character which is imposed in the country of the principal financial centre of the Relevant Currency; or (ix) **Unavailability of Settlement Currency.** The unavailability of the Settlement Currency in the country of the principal financial centre of the Relevant Currency, or where the Settlement Currency is the Relevant Currency, the unavailability of the Relevant Currency in the principal financial centre of any other applicable currency; or (x) Any other event similar to any of the above, which could make it impracticable or impossible for the Issuer to perform its obligations in relation to the Securities. **"Relevant Currency"** means, unless otherwise specified in the terms and conditions of the Securities, the Settlement Currency, the lawful currency in which the underlying of the Security or any constituent of such underlying is denominated, from time to time, or the lawful currency of the country in which the Exchange or the primary exchange on which an underlying or any constituent of such underlying, is located provided that Relevant Currency shall not include any lawful currency that is a Standard Currency. Notwithstanding the foregoing, where the underlying of a Security is a fund, including but not limited to, an exchange traded fund, a mutual fund, a unit trust or a hedge fund, or an American Depositary Receipt ("**ADR**") or Global Depositary Receipt ("**GDR**"), the constituents of such fund, ADR or GDR as applicable, shall not be considered for the purpose of this definition; **"Relevant Currency Exchange Rate"** means each rate of exchange between the Relevant Currency and the Settlement Currency, or where the Relevant Currency is the Settlement Currency, between the Relevant Currency and any other applicable currency, as determined by the Calculation Agent by reference to such sources as the Calculation Agent may reasonably determine to be appropriate at such time; **"Standard Currency"** means, unless otherwise specified in the terms and conditions of the Securities, the lawful currency of Australia, Austria, Belgium, Canada, Cyprus, Denmark, Finland, France, Germany, Greece, Hong Kong, Ireland, Italy, Japan, Luxembourg, Malta, the Netherlands, New Zealand, Norway, Portugal, Singapore, Slovenia, Spain, Sweden, Switzerland, Taiwan, the United Kingdom and the United States, or such other currency as determined by the Calculation Agent at its sole and absolute discretion from time to time.

(m) **Open End Certificates.** Open End Certificates are investment instruments which, at exercise or termination pay an amount equal to the level of the underlying asset(s) subject to the certificate entitlement, foreign exchange rate and expenses. As such, they entail the same level of risk as a direct investment in the underlying asset(s). Investors should be aware that their entire investment may be lost, in the event that the underlying asset(s) is valued at zero. The investor should be aware that the Issuer is entitled to terminate the Open End Certificates under certain circumstances against payment of an early termination amount which may be substantially less than the market value of the Open End Certificates at the issue date and in an extreme case, could be zero. In the event of termination, unlike direct investments, as the Open End Certificates now have a limited term, investors are not able to hold them beyond the termination date in the expectation of a recovery in the price of the underlying asset(s). The price at which an investor will be able to sell Open End Certificates prior to exercise or termination may be at a substantial discount to the market value of the Open End Certificates at the issue date, if, at such time and in addition to any other factors, the value of the underlying asset(s) is below, equal to or not sufficiently above the value of the underlying asset(s) at the issue date. If the underlying asset(s) is a non-euro-underlying the FX rate may affect the value of the Open End Certificate. Past results do not guarantee and are not indicative of future performance. The value of each product can fall as well as rise.

(n) **Issuer Call Feature.** An option for the Issuer to call the Securities is likely to limit their market value. During any period when the Issuer may elect to redeem the Securities, generally, the market value of those Securities will not rise substantially above the price at which they can be redeemed. This also may be true prior to any redemption period. The Issuer may be expected to redeem Securities when its cost of borrowing is lower than the interest rates on the Securities. At those times an investor generally would not be able to reinvest the redemption proceeds at an effective interest rate as high as the interest rate on the Securities being redeemed and may only be able to do so at a significantly lower rate. Prudential investors should consider reinvestment risk in light of other investments available at that time.

(o) **Emerging market currencies** have unique characteristics, trading behaviours and risk profiles not typically associated with investing in major foreign exchange currencies. Such risks may include (i) Economic Risk: economic conditions may change unexpectedly and rapidly; (ii) Political Risk: governments may have a more active role in emerging market countries; (iii) Economic Transparency: emerging market's economic policies and activities may not be transparent; (iv) Monetary System Risk: emerging market currencies may have different approaches to currency valuation ie. free float, managed float or fixed rate; (v) Illiquidity Risk: there may be an illiquid market in the relevant currency as a result of the volume and activity of currency traded and the relevant bid and ask spreads; (vi) Price Source Risk: the risk that prices for the relevant currencies are absent or unreliable; (vii) Information Transparency Risk: timely and reliable information may be unavailable.

Prior to making an investment decision, prospective investors should consider carefully, in light of their own financial circumstances and investment objectives: (i) all the information set forth in the Issuer's programme, as supplemented from time to time and, in particular, the considerations set forth

therein under "Risk Factors"; and (ii) all the information set forth in the offering documents, base prospectus and/or final terms, as applicable, for the Securities. Prospective investors should make such enquiries as they deem necessary without relying on the Issuer of the Securities.
